Statistics

1979

BY GIJS KNOPPERT

PUBLISHED AS AN ADDITION TO W.A.V.A. NEWSLETTER NUMBER 2. SEPTEMBER 1980.

WORLD RANKINGS of VETERAN-athletes. 1979.

INTRODUCTION.

For the second time we are able to offer you a booklet with statistical information both regarding women and men. Officially assigned with the task of the compiling of year rankings in behalf of the members of the WAVA I was disappointed that from so few countries I received the promised information.

Fortunately we are as good as complete about West-Germany, England and Holland. Good material was sent from Norway and Australia. Belgium and Ireland made contributions. Some well known athletes were writing to me. However much information is of own researching and because of that pityfully incomplete. Thanks too to the friendly help of the Dutch member of the ATFS, mr J. Keumans some nations are still good represented in the rankings.

After Helsinki and Christchurch we may hope, that the national delegates may be aware of the importance of complete statistics.

Athletes who are proceeding from one age group to another within a year may be recorded with more personal bests; therefore birth dates and venues are very important. Another problem occurs with the different types of weights and the height of the hurdles; than we are often unknown with the measure of wind assistance by the sprint and long jump. From Mr Erling Svennevik I received a very detailed booklet with the results of the Norwegian National Championships which can serve as an example in this matter. For instance: in Hannover there was some help of the wind at the triple jump. Nevertheless I listed the results, because of the lack of other information (Strauss, Vera Guarcia a.o.). Next year I am fixing a deadline for information by may 31.
